A 4* luxury wellness hotel with centuries of history - the romance of castle hotels and a legend.

The History of Oxigén Family Hotel****

Noszvaj is one of the cleanest settlements in the country, therefore it is a great tourist destination. The proximity of Eger, the many natural treasures and historical sights make it a great destination for trips. Being located in the countryside, the Oxigén Family Hotel**** makes it perfect with Zen Spa experiences.

Noszvaj was originally founded by Italian settlers. This is where its name comes from, as “noszvaj” means “our village” in Latin. Settlements in the area (e.g. Olaszliszka) have a similar Italian past. The history of our wellness hotel started with the appearance of French influence, the settlement of the De la Motte family. The most important monument in the center of Noszvaj is the Castle De la Motte, built in late Baroque style. In the 19th century, in the place of the Oxigén Family Hotel there was a similar property belonging to the castle. In the late 1800s, the owner planted 220 pine trees on the site of the current park, which turned it into lush greenery, providing a wild atmosphere, pleasant air and shelter from the Sun.

The very first stop in the history of our hotel can be dated between 1901-1904, when the predecessor of the current hotel was built, which was named Berta's House after the wife of the owner of Castle De la Motte. At the beginning of the 20th century, significant changes were made in the life of the hotel: a well-groomed English park was established around the building, rare flowers and shrubs were planted. Using modern agricultural tools of the time, a model farm was created.

Wedded into the family De la Motte, Count Galassy traveled all over the world, bringing bathing, meditation and the special Japanese wellness - Zen Spa - experience from his East Asian tours. He created a lake in the hotel's park with small bridges and a bathhouse, which presumably stood in the place of the hotel's current Zen Spa.

At that time, viticulture and wineries played a prominent role in the village. Next to the hotel, the former manor cellar, today's Thummerer Cellar can be found.

If you would like to try a truly historic wine, you can do so in the restaurant of Oxigén Family Hotel****.

The second half of the last century was important in the history of our hotel, it operated as a holiday resort. After the transformations, from June 2012, our four-star baby- and child-friendly wellness hotel awaits families, who want to relax with many unforgettable experiences, outdoor and indoor programs. Legends about the famous hive stones are interesting, they can be found in Noszvaj and Szomolya. They are believed to reflect the energy of the Earth, that's why the surrounding area can be associated with an energizing effect. If your destination is Eger, it is worth staying at the Oxigén Family Hotel, because the city experience is perfectly complemented by the energy of Noszvaj.

A family legend about Mrs Berta: Find traces in the castle park!

According to a secret legend, Ms. Berta, the wife of the owner of the Castle De la Motte, walked around the building in the evenings, talked to the trees and bushes, and took her favorite flowers. The plants were almost full of life from this care, and nature was renewed.

Walk down the path in the hotel garden where Mrs Berta once did and observe nature showing us that care.

Our services:

Our hotel is the first four-star all-Inclusive hotel (for children) in Hungary, which was designed specifically for families with small children. It was important to us that children could use the exterior, interiors and services of the building comfortably and safely. The goal for our guests is to spend as much time in nature as possible. After polluted air in the city, the crystal clear air cures the whole body, not only “treats” respiratory diseases but also helps to prevent them.

The most fantastic thing in our baby and child-friendly hotel is that we take care of everything, so you can get on the road with your family and you don't have to worry about forgetting anything at home. In fact, you don't have to bring anything except clothes and the children! We provide bicycles, baby baths, booster seats, respiratory monitors, nursing bottle warmers, baby beds, highchairs and so many practical, useful things!

We are waiting for children and babies with many child-friendly services

While our animators invite the children to many adventures, parents and grandparents can enjoy the pampering services of our Zen Spa. If you would like to use our animation service, let us know at the reception! Of course, we thought about the youngest children, we can offer our baby animation service for children aged between 0-3. Our creative animators are looking after the children, that makes the time spent together enjoyable for babies.

The Oxigén Family Hotel **** has special attention to its wellness empire so that children, parents, and even babies could enjoy the wellness experience.

There are many options which younger and older children can enjoy. In the heart of our wellness area you can find one pool for the smallest babies and one pool for the children, where many toys are waiting for them. The children can try out the following outdoor activities: parking field, the squirrel adventure park, or the mini adventure track for younger adventurers. Trampoline, bowling, basketball, volleyball court, ping-pong, soccer field and a lot of activities await families in our huge green park. The Dínó playhouse always has a cheerful jingle when it's too hot or raining outside, or when the children are looking for a little foosball, darts, x-boxing.

The hotel also paid great attention to the location of families with small children. Larger rooms and suites have been specifically designed for families, and most of the smaller rooms can be joined together. The restaurant has two separate rooms with a highchair, feeding set for children, bottle warmer and a playhouse. As part of our child's all-inclusive service, we provide children under the age of 10 five times a day with unlimited drinks.

Our hotel offers children an all-inclusive service, which is available from 2 p.m. on the day of arrival to 10.00 a.m. on the day of the departure.

Event Venue

The hotel's technical equipment is well suited for business negotiations, conferences, team building training, weddings, exclusive meetings and gala dinners. Our conference room can be divided into three smaller parts with mobile walls, and the foreground in front of the room is ideal for coffee breaks, which we provide for the perfect event.

Smithery

The Smithery Workshop is called "Antik-Anti" in the village.

Local homemade products

Noszvaj is famous for its local, homemade products such as cheese, honey, ham, meat, jam, bread and cherries. Careful housewives make the recipes left for them from the elders. They are worth a try.

Close to Noszvaj, the famous Zsóry Thermal Bath and Spa, which was renovated in 2011, is in the neighborhood of Mezőkövesd. Many people visit it because of its pleasant, warm healing water.

Saunas**

The Finnish sauna gives you a great experience of detoxification, which has a very special solution here: sitting behind huge windows in the heat of nearly 85-95 degrees, you can admire nature in winter or summer. This is not just a sauna, it is a Zen spa sauna experience in itself. Please read our etiquette and advice before using the sauna in the Zen spa!

The infrasauna is also a salt chamber, here in 30 minutes, our body replaces the cells, they are cleared, renewed, and the toxins disappear. Enjoy the cleansing and smoothing effect of your skin! Your lungs will feel the clean air of the salt, moreover, they will be grateful for the time of doing something beneficial for your health. Please read our etiquette and advice before using the sauna in the Zen spa!

The steam bath is not an usual sauna, you have to try it too! An intense experience that cleans and detoxifies. It is a very high humidity cabin with 50°C. Steam is responsible for cleaning the airways and the skin. It is well suited for treating upper respiratory complaints and asthma symptoms. Heat causes pores to expand, and clear because of the steam.

Dive pool: 18°C pool, as the body should be cooled with a shower after the heat of the saunas. With the cold water of the plunge pool, we restore the condition of the blood vessels and thus the blood circulation, so we can really train our immune system.

Children's aroma cabin: a sauna of 40-45°C, which is excellent for strengthening the immune system of children and babies. The effect of lukewarm sauna can be enhanced by using essential oil.

Spirit Room: After the sauna, we created a quiet room for our guests who want silence and relaxation.
